 - See www.soholaunch.com for detailed information about the free Site Builder from Oceania.
 - Our staff are more than happy to customize a template for you or convert your site to the site builder. (Many existing websites can be converted.) Please ask us for a quote.
 - If you like, we can purchase and import a template for you. Just send us the link to your chosen template (include the ID #) and we will let you know whether it is compatible with Soholaunch.
 - Whilst you are learning to use Soho Site Builder we suggest that you install it into a subdomain. A subdomain can be created using the cpanel> Domains> Subdomain. EG say you enter the word "trialsite" as your subdomain name then when installing the soho site builder you would select "trialsite.yourfulldomainname.xxx" from the dropdown list for the installation. When you are happy with the result the trial site contents can be moved over into the main public_html directory.
 - Should you need support – we are just a phone call away. Have your log in details handy!
